Dear Alumni and Friends,

Join fellow alumni and friends as we explore the Galapagos Islands. Designated the first UNESCO World Heritage Site in 1978, the Galapagos Islands have been described as a "unique living museum and showcase of evolution." They are home to a fascinating array of wildlife inhabiting an unspoiled ecosystem, living in harmony with their human visitors.

This exciting journey features a day of guided touring in Quito plus an intimate cruise through the archipelago with up-close access to endemic species. Expert naturalists guide you through the wonders of this national park, whale sanctuary, and marine reserve.

Accommodations for this adventure are aboard the *Isabela II*, a 40-guest vessel with spacious cabins, local cuisine, and a staff dedicated to ensuring both your comfort and maximum enjoyment of this truly extraordinary destination and its diverse inhabitants. And sailing by small ship allows for flexibility in the itinerary to maximize wildlife viewing, as well as access to exclusive ports.

Stateroom availability is limited. With significant savings of more than \$1,000 per couple, we anticipate this tour will fill quickly, so be certain to reserve your spot today.

Please reserve by contacting the Vanderbilt Travel Office by calling 615.322.3673.

With best wishes,

Cary DeWitt Allyn  
Director, Vanderbilt Travel Program

*The Vanderbilt Travel Program strives to engage Vanderbilt alumni, parents and friends of all ages, keeping them connected with each other and Vanderbilt. Each carefully designed trip offers unparalleled learning opportunities for an exclusive "beyond the classroom experience."*

Dr. Morgan is a geologist who studies the processes that create landscapes on Earth's surface and how landscapes evolve as environmental conditions change. Most of his research is in glacial geology where he studies the landscapes that glaciers create to learn about the timing and extent of past ice ages. For over twenty years, Dr. Morgan has studied the long-term glacial history of Antarctica, including seven field seasons on the continent. Like the Galapagos, there are no land predators on Antarctica and animals have evolved in distinct ways to adapt to the unique environment.
